

5 Signs it's Time to Toss Your Video Collaboration

Is your audio and video conferencing solution the most disruptive attendee at your meetings?

82%
Experience audio issues

8Min
Wasted getting video meetings started

67%
Remote meetings have audio issues

17%
Satisfied with their video meeting solution

CLEAR SIGNS IT'S TIME TO THROW OUT YOUR MEETING ROOM SOLUTION

01 Delays and Technical Difficulties

It takes an average of 8 minutes to start an online meeting—that's nearly a third of a 30 minute gathering!

YOU CAN Start On Time, Every Time

Quit fussing with equipment and let workers run meetings with ease. Highfive gives you:

- One-touch meeting launch
- Web-based interface works for everyone
- Simplified screen sharing from any participant
- Integrations with Outlook, Slack, G Suite, and more

02 Struggle to Share In-room Collaboration

Remote participants are excluded from whiteboard and sticky note sessions, feeling left out and unable to contribute.

YOU CAN Have Great Collaboration for All

Let remote employees fully participate by giving them a virtual seat at the table. Highfive gives you:

- Augmented whiteboard view
- Automated presenter focus
- Consistent quality experience from any device, any location
- Seamless movement between devices and rooms

03 Hard to Connect

Meeting software requires downloads, extensions, and software installations. Add to that PINs, 800-numbers, and passwords. So many things to go wrong.

YOU CAN Join with a Tap

Eliminate the complex sign in process and get to work. Highfive gives you:

- Meetings you can join with a click
- Screen sharing by all – instantly
- Fully secure access without PINs or codes
- Great brand experience for prospects, customers, and partners

04 Distracting Poor Audio and Video

Background noise, hard-to-hear participants, and frozen video are hallmarks of conferencing technology that needs to go.

YOU CAN Experience Like You're There

No matter where you sit or how you connect, you'll enjoy a high-quality experience. Highfive gives you:

- Crisp, clear audio with best-in-class Dolby Voice®
- Eliminate background noise and echoes
- Auto-adjustments for loud or soft voices
- Beautiful, intelligent wide-angle high-def video

05 Complex Equipment Collecting Dust

Piles of hardware, a nest of cables, a separate phone, confusing software – and an outdated “cheat sheet” that's supposed to explain it all. Don't bother!

YOU CAN Make it Easy for Everyone

With elegant hardware and streamlined software bundled together, setup takes just a few minutes. Highfive gives you:

- Integrated fuss-free bundle
- Plug a few cables and GO!
- Monitors automatically connect
- Easy integration with collaboration, calendar, and other productivity software

Better Video Collaboration that Workers (and IT) Love

Highfive has reimagined meeting room collaboration, improving the ease and quality of in-room video conferencing – for formal rooms and huddle rooms alike – so teams can get their best work done.

Our unique, all-in-one cloud platform provides:
